

Before you create your pack

A practical photo checklist for the Snapics seven-image offer. Use it before uploading, then compare every delivered image with your source.

☐ Show the whole product

Use one clearly separated product. Keep handles, straps, corners and controls inside the frame. Avoid other products that could confuse its identity.

☐ Start with a sharp, well-lit image

Use soft, even light and a simple background. Avoid motion blur, harsh reflections and deep shadows. Keep the original high-resolution file; a larger export cannot restore missing detail.

☐ Make identifying details readable

Check labels, markings, color and proportions at full size. Do not expect the model to reconstruct obscured text, a hidden side or an unseen feature.

☐ Confirm your source and rights

Use a supported PNG, JPEG or WebP photograph that passes the upload checks. For a product-page link, inspect and confirm the imported image. Use only images you are authorized to process.

☐ Check the saved plan before paying

Confirm the product name, source, copy and style. The \$9 offer includes two 1024 x 1024 creative images and five layouts. Availability and the saved checkout terms apply.

☐ Review before you download

Compare both creative images with your source: shape, color, components and text. Approve or reject in the saved pack. Review captions and alt text before using the PNGs and ZIP.

Layouts: main 1600 x 1600; banner 1600 x 900; feed 1080 x 1350; story 1080 x 1920; ad 1080 x 1080. These canvas sizes do not imply additional photographic detail.
